Education

University of Pécs

Bachelor of Science in Computer Science Engineering

Sep. 2021 – January 2025

Pécs, Hungary

Swinburne University of Technology

Bachelor of Science in Computer Science

Mar. 2021 – August 2021

Melbourne, Australia

Relevant Coursework

- | | | | |
|------------------------|--------------------------------------|-----------------------|-------------------------|
| - Software Engineering | - Database | - Computer Networks | - Web Development |
| - Algorithm Design | - C, Java, C#, Python, Ruby on Rails | - Internet Technology | - Computer Architecture |
| | | | - Operating Systems |

Experience

Harvest Greener; Vienna, Austria

May 2023 – August 2023

IT, Research Intern & CEO Assistant

- Led web development using HTML, CSS, and JavaScript, improving user experience for a B2B platform which benefited hundreds of farmers in Austria to use/sell their products to sellers.
- Contributed to front-end and UI design for Android mobile app using Flutter.
- Conducted research and competitive analysis for strategic decision-making.
- Collaborated with the team using Git and Asana for version control.

Side Projects

Transition to Circular Economy / Grant, Application, Workshops, Maker's Space

Feb. 2023- Sept.2023

- Secured prestigious EU grant for visionary circular economy project with the proposal of establishing fully equipped maker's space with robotics tools and electronics for students for the first time in faculty.
- Empowered students through innovative workshops, enabling projects like making 3D filament from plastic bottles.
- Led and managed a dynamic team to drive project success by also taking care of the creation of an app which detects degradable stuff with university's green program.
- Cultivated vital sustainability partnerships with industry leaders (BAT, BOSCH, Lafarge) to expand circular economy initiatives throughout the Baranya region.

Google Developer Student Club | Lead

July 2023 – Present

- Enlightening students through tech-workshops (full-stack development, AI, ML) and arranging development fest, solution challenge to bring the practice of google application codes.
- Took charge of assembling and nurturing a high-performing team, fostering a collaborative and productive work atmosphere that allowed us to achieve outstanding results.
- Leveraged my extraordinary oratory skills to lead and inspire the team, enabling effective communication and alignment toward shared goals.

Sustainability Calculator App / Java, Android Studio

July 2023

- Created an Android application using Java and Android Studio to detect degradable/biodegradable stuff if scanned which has been used by people specially within the university to raise awareness against the dump thrown in environment as Pecs has been losing its greenery.
- Created UI for the application for encouragement and user's good experience.

Jersey Shop Desktop Application App | C#

- Developed an object-oriented windows form desktop application for a jersey shop to purchase, list products.

Technical Skills

Languages: Python, Java, C, HTML/CSS, PHP JavaScript, SQL Data models, Ruby on Rails

Developer Tools/Technologies/Framework: VS Code, Google Cloud Platform, GitHub, Gitlab

Technologies: Trello, Jira, Asana

Leadership / Extracurricular

International Student Ambassador

Spring 2022 – Present

University of Pecs

- Assisting more than hundreds of students worldwide to help facilitate higher education in Hungary having extraordinary communication skill.
- Led chapter of 20+ members to work towards goals that improve and promote community service, academics, and unity.

Fanni Sélley-Rauscher

Early Career Recruiter
Wise

Dear Ms. Fanni,

Having been very profoundly passionate about web and software development blending with my years of experience in extra-ordinary leadership and communication skills, I found Wise's Software Engineering Intern position strongly aligns with my experience. My extensive research and availability further reinforces my conviction that I would be a **highly valuable investment** for the company.

A compelling facet of my candidacy for this role stems from my reputation as a **"people's person."** My innate inclination to assist and collaborate with others has consistently defined my life, harmonizing seamlessly with my unwavering commitment to leadership and my proactive engagement in an array of extracurricular clubs and initiatives. At my university, I achieved a milestone as the inaugural international student to secure a grant for pioneering the establishment of a circular economy. Presently, I lead a diverse team of 20+ individuals, driving sustainable practices that benefit both local companies and our academic institution. My leadership extends beyond academia, as I have taken the helm of the Google Developer Club. This role has enriched my coding expertise and honed my communication skills, ensuring I am an adept and articulate communicator.

My fervor for **web development** has driven me to shape and enhance approximately 6 to 7 websites (including 2 companies), a journey of continuous improvement. My background includes dedicated research in this field and hands-on experience with **RESTful web services**. This practical involvement encompasses the creation of applications in multiple languages, underscoring my aptitude for translating complex technical concepts into accessible and compelling explanations for your clients and customers.

By selecting me, you gain a strategic asset for your expansion plans. I am committed to mutual growth, offering significant returns to both myself and the company. My **unwavering enthusiasm for learning and seamless integration within a team, capable of adapting to emerging technologies, makes the position at Wise particularly appealing to my professional aspirations.**

I eagerly anticipate the opportunity to discuss my aptitude for the company role and the position further during an interview] to provide a more in-depth presentation of my qualifications. Thank you for your consideration.

Sincerely,

Maisha Maimuna
